

Environmental Impact Assessment

Impacts are positive & negative, effects consequential & cumulative or singular & mitigable.

Through careful research, effective consultation & appropriate documentation, Inukshuk teams produce thoughtful technical reports, easy to understand public displays & defensible conclusions that ensure review processes run smoothly, fairly & in a timely manner for our clients.

Lot 40 Mt. Sima Industrial Park Lot Enlargement

Inukshuk prepared the Business Case and YESAA submission and coordinated the rezoning and submission approval including realignment of a future rail right-of-way.

Client: P.S Sidhu Trucking Ltd.

Ta'an Kwäch'än C-23B Land Lease Subdivision

Inukshuk designed this 25 lot land lease residential subdivision managing the subdivision, rezoning and YESAA review process on behalf of TKC. This involved coordinating the work of the geotechnical, biophysical and heritage assessment and preparing the project description.

Client: Ta'an Kwäch'än Council

Stevens Quarry Design YESAA Submission

This project involved preparation of quarry development and reclamation plan, coordination of technical specialists, submission of the project description and liaising with YESAB officials over this controversial project.

Client: City of Whitehorse

McGowan Geotechnical YESAA Submission

Inukshuk and Chilkoot Geological Engineers Ltd planned a minimum invasive test program respecting the fishery, wildlife and recreational use values present. The YESAA application was approved and the work completed.

Client: Government of Yukon, EMR
