## Alternative Development Standards Literature Review

This study examined current national and international literature and considered the applicability of the methods being used in a northern and Yukon-specific context. Planning design concepts and site servicing methods were examined and project highlights described. The study resulted in the most comprehensive bibliography currently available on the subject.

*Client: Government of Yukon*

## Dawson Waterfront Plan

Inukshuk identified lands available for use and which uses might be acceptable from a community development perspective. The plan provided an objective evaluation of the opportunities and constraints imposed by the existing uses, land ownership pattern, site location and management jurisdiction.

*Client: City of Dawson*

## Sustainable Development Workshop

Inukshuk facilitated a workshop for on the development of sustainable development strategies. Working with the Council for Yukon First Nations, workshop participants reviewed strategies prepared by the Department of Indian and Northern Development, Environment Canada, Department of Fisheries and Oceans, Department of National Defence and Energy, Mines and Resources Canada.

*Client: Government of Canada/ Council for Yukon First Nations*

## Kluane National Park Visitor Reception Centre Recapitalization Plan

Since its original construction, the VRC has undergone numerous minor renovations to accommodate changing staff needs. Over the ensuing years, new needs arose, such as the need for retail space, requiring further design changes. Our role included analyzing building condition, site issues and interpretive messaging to suggest possible design and programming solutions.

*Client: Parks Canada*
