

Environmental Impact Assessment

Impacts are positive & negative, effects consequential & cumulative or singular & mitigable.

Through careful research, effective consultation & appropriate documentation, Inukshuk teams produce thoughtful technical reports, easy to understand public displays & defensible conclusions that ensure review processes run smoothly, fairly & in a timely manner for our clients.

Agricultural Chemicals Complex Expansion

Responsible for obtaining rezoning, coordinating plan of subdivision, road closures, preparation of the environmental assessment report, public consultation, advising on land purchase negotiations and Industrial Development Permit procedures for a \$500M expansion of existing fertilizer complex. The project was completed in record time, with all work and approvals including Cabinet authorisation completed within six months.

Client: Esso Chemicals Canada

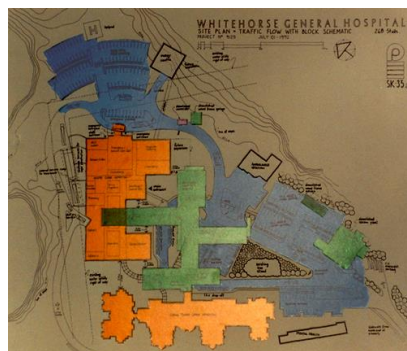

Alsek Pass Initial Environmental Evaluation

In a joint venture with Axys Environmental Consulting Ltd., the study team assessed the potential benefits and impacts associated with a proposed road and day-use area to be constructed in an

environmentally sensitive area on the boundary of Kluane National Park.

Client: Canadian Heritage Parks Canada, Government of Yukon

Whitehorse General Hospital/Extended Care Facility Environmental Assessment
